5.8 While maintaining the secrecy of Bidder's identity, the web site shall register and display on screen the highest bid prices of various different allocated quantities at that point of time. The system will not allow a bidder to bid in excess of his entitled quantity as per his EMD. However, once the bidder is out-bided by another, the particular bidder shall become eligible for making an improved bid offer. For example, Bidder 'A' who has deposited pre-bid EMD for 2000 MT of Rock Phosphate submits the following bids:

- 1000 MT @ Rs.6000/-.
- 600 MT @ Rs.6020/-.
- 400 MT @ Rs.6010/-.

After submission of these bids, Bidder 'A' will not be able to further improve these bids, either in terms of Price or Quantity. As the bidding progresses, Bidder A will be able to bid further only for that quantity that gets cut from his quota of allotted quantity.

5.9 Following criteria would be adopted for each lot in deciding the successful bidders:

- (a) Precedence will be accorded to the highest bid price in the descending order (H1, H2, H3 and so on) as long as the offered quantity is available for allocation.
- (b) If two or more buyers bid the same highest price, precedence for allotment will be accorded to the buyer who has placed the bid for the higher quantity.
- (c) In case, two or more buyers bid the same price and the same quantity, precedence will be given to the buyer who has offered its bid first with reference to time.

5.10 THE ONLINE AUCTION WILL BE DONE AS PER THE FOLLOWING METHODOLOGY:

(a) The bidders have to bid for per MT price and the Quantity (in accordance with Clause 5.6 and 5.7) they want to book at that price with a maximum limit of quantity for which bidders had provided Pre-Bid EMD.

(b) Methodology for the single stage online bidding is mentioned here under. Assume that the total quantity available is 900 MT and customers bid for certain quantity at a certain price as illustrated in the following table:

Bidder	Bid Time	Bid Quantity (MT)	Bid Price (Rs/MT)	Allocated Quantity (MT)
B	9:40	100	8650	100
F	9:39	350	8600	350
D	9:36	300	8600	300
A	9:32	100	8600	100
E	9:34	100	8600	50
C	9:30	300	8550	0

1. Bidder B is the highest bidder @ Rs.8650/- per MT; hence the system allocates his bidden quantity i.e. 100 MT.
2. There are 4 bidders @ Rs.8600/- per MT, since bidder F's bid was for 350 MT (highest quantity at Rs.8600/- per MT), the system allocates his bid quantity in full.
3. Bidder D's bid was for 300 MT & since the quantity was still available at Rs.8600/- per MT the software allocates bidder D 300 MT.
4. Since bidder A placed his bid earlier than bidder E i.e. 9:32 Hrs hence the software gives first preference to bidder A & allocates him available quantity first.
5. After this allocation, since only 50 MT are available, the same is allocated to bidder E.
6. Since all the quantity is exhausted at higher bid price than Rs.8550/- per MT, therefore no quantity is allocated to bidder C. If Bidder C wants to win any quantity then they have to place bid in terms of higher price or greater quantity.

Note: All the allocations will be provisionally under STA (Subject to Approval). The Principal will give approval/rejection based on the rate at which they intend to sell. The pre-bid EMD shall be retained with MSTC till the decision is given by the Principal.
